

Ready Study Go Around Europe!

RSGAE Project presentation

Project aim and objectives

- Foreign languages are needed in everyday working life and language skills should be a part of professional skills and competence.
 - The material created in this project answers this need by combining vocational content and language learning material.
- The aim of RSGAE is to utilise mobile learning in cultural and language learning.
- The project will produce language material with vocational content in eight languages (Estonian, Finnish, Hungarian, Italian, Polish, Spanish, Swedish and Turkish) to several sectors (general and cultural, vehicle, tourism and hotel, restaurant and kitchen and social and health care)

Project outcomes

- Material is meant for vocational students in preparation for their work-based learning periods, for teachers and work place instructors. Also employers can use the material in their personnel training
- Mobile application that will be created makes it possible to use the material in real life working situations in work places more easily

Partners

- Network consists of 10 educational partners in 8 countries
 - Finland: Omnia and Lapland Vocational College
 - Sweden: Multicultural Finnish Folk Highschool in Gothenburg
 - Estonia: Tartu Health Care College
 - Italy: Qualitas Forum srl.
 - Hungary: Andrassy György Catholic Business Academy
 - Spain: University of Alicante
 - Turkey: Metegder
 - Ireland: Institute of Technology Tralee

Work plan

- Project lasts from November 2013 until October 2015
- The material is developed in teams of vocational and language teachers integrating vocational content into language materials.
- Three workgroups producing online language and cultural coaching material.
- Materials will be tested by the three target groups: vocational students, teachers and work place instructors.
